M.C.A. Ist Sem. w.e.f. Dec. 2011 (New)

Examination – December, 2012

DIGITAL DESIGN

Paper : MCA-103

Time : Three hours]

[Maximum Marks : 80

Before answering the questions, candidates should ensure that they have been supplied the correct and complete question paper. No complain in this regard, will be entertained after examination.

Note : Question No. 1 is compulsory. Attempt four more questions, selecting one question from each Unit.

1. Answer the following questions briefly : $8 \times 2 = 16$

- (a) Define static RAM.
- (b) Write uses of 2's complement.
- (c) Describe two advantages and two disadvantages of alphanumeric codes.
- (d) Discuss uses of Hamming code.
- (e) Explain parity bits and their uses.
- (f) What is BCD code ?

67043-1,450-(P-3)(Q-9) (12)

P. T. O.

- (g) Write advantages of K-map.
- (h) Convert decimal number 56.25 to its binary equivalent.

UNIT - I

- 2. (a) What is binary division? How is it useful and used? Discuss with examples. 8
- (b) Discuss uses and advantages of floating point numbers with examples. 8
- 3. Explain the following briefly with suitable examples : 8 each
 - (i) Convert binary number 11100111001.0001 to its octal and hexadecimal equivalents.
 - (ii) Subtraction using 2's complement method.

UNIT - II

- 4. (a) What is fan out of logic gates? How is it useful and used? Explain with examples. 8
- (b) Discuss important features of Boolean algebra with suitable examples. 8
- 5. Describe the following with examples : 16
 - (a) Quine-McCluskey tabular method.
 - (b) ECL logic family and its applications.

UNIT – III

6. (a) What is T -flip flop? How is it used and useful?
Explain it with suitable example. 8
- (b) Discuss uses of encoders and decoders with
suitable examples. 8
7. Explain the following with examples : 8 each
- (i) Differentiate between synchronous asynchronous
inputs.
- (ii) Programmable logic array and its uses.

UNIT – IV

8. (a) What is ripple counter? How it is used and
different from synchronous counter? Discuss with
examples. 10
- (b) Explain RAM architecture with suitable
examples. 6
9. Explain the following with examples: 16
- (i) BCD counters
- (ii) Shift register and its uses
