M. Tech 2nd Semester (MAE) CBCS Scheme (Elective - I) Examination – May, 2018

QUALITY CONTROL TECHNIQUES

Paper:MTMA22D1

Time: Three Hours] [Maximum Marks: 100 Before answering the questions, candidates should ensure that they have been supplied the correct and complete question paper. No complaint in this regard, will be entertained after examination. Note: Attempt five questions in all. Question No. 1 is compulsory and attempt one question from each Unit. **1.** Explain the following: (a) Control limit theorem 5 (b) Methods of Sub-grouping 5 (c) Control limit 5 5 (d) Consumer's Risk P. T. O. 22624-文5。 -(P-2)(Q-9)(18)

UNIT - I

- **2.** Explain the various steps in Quality Control with the help of suitable example.
- Explain the continuous and Discrete Probability distribution with the help of some Industrial validated example.

UNIT - II

- **4.** Describe the interpretation of out of control used in quality control techniques.
- **5.** Explain the process capability studies or process capability Index Methods with the help of suitable example.

UNIT - III

- **6.** Describe the special control charts for variables and their implementation.
- **7.** Explain the variable inspection and attribute inspection with the help of suitable example. 20

UNIT - IV

- **8.** (a) Explain the Binomial and Poisson distribution with the help of some case study example.
 - (b) What do you mean by sampling plan and types of sampling plan?
- **9.** Discuss single and double and multiple sampling plan.
